

Information Security Policy

Retter, which provides internet-based software development services, takes the necessary measures to protect the data of its stakeholders and implements the ISO 27001 Information Security Management System.

Accordingly, we are committed to:

- Maintaining the balance of the three fundamental elements of information security — integrity, confidentiality, and availability — throughout all our activities, and protecting these elements across all information assets
- Raising information security awareness through the participation of our employees
- Monitoring legal requirements related to information security and ensuring compliance
- Following developments in information security and taking precautions against cyber incidents and information security breaches
- Keeping pace with technology and providing the infrastructure required for information security
- Protecting the data of our customers, employees, suppliers, and all other stakeholders
- Ensuring business continuity and providing uninterrupted service to our customers

These principles constitute our Information Security Policy.
